

Derived Role Information

View metadata and deviation reason for this derived role

This is a derived role. It inherits permissions from Company Admin role with tracked deviations for audit purposes.

Role name: Project Manager

Derived from: Company Admin

Created by: Sarah Chen

Created on: 15 Nov 2024

Reason for deviation:

Project Managers need full project access but should not have company-wide admin capabilities. This role removes user management and billing permissions while maintaining all project and forecast controls.
